

Minnesota AFL-CIO Sample Precinct Caucus Resolution
Medicare: Negotiate Prescription Drug Prices

BE IT RESOLVED: That the _____ party allow Medicare to negotiate the cost of prescription drugs in order to lower the cost of prescription drugs for millions of Americans.

TALKING POINTS:

- Over 47 million Americans including seniors and many disabled adults are covered by Medicare.
- Medicare is the country's largest purchaser of health care and has delivered stable, reliable health care while controlling the growth of costs better than private insurance companies.
- Prescription drug costs represent a disproportionately high share of health care costs due to monopoly control of large drug companies.
